

# Indiana Patient Registry Training

Comorbidity

You can add comorbidity factors in this tab.

# Comorbidity Screen

The screenshot displays the ImageTrend Patient Registry interface. At the top, a navigation bar includes links for Facilities, Data Exchange, Report Writer, and More. A user bar on the right shows 'Welcome, Katie Gatz' and options for Administration, Logout, and a user icon. Below this is the 'IMAGE TREND PATIENT REGISTRY' logo and a series of tabs: Dashboard, Incidents, Staff, Users, and Setup. A secondary set of tabs represents different stages of patient care: Demographics, Injury, Pre-Hospital, ED / Acute Care, Initial Assessment, Diagnoses, Comorbidity (highlighted in yellow), Procedures, Complications, and Outcome Information.

The main content area is titled 'Edit Incident » Indiana Trauma Form » IT-130926-205' and includes a 'Mark As Completed' button. It contains several data fields: 'Validity: 99%', 'Status: In Progress', 'Lock: Unlocked' (with a dropdown arrow), 'Import Status: Typed In', and 'Entered: 09/26/13 by Katie Gatz'. On the right side of this section, it lists 'Trauma Registry #: IT-130926-205', 'Patient: Gatz, Katie L', 'Medical Record Number: test', 'NTR Inclusion: Yes', and 'Updated: 09/26/13 by Katie Gatz'.

The 'Comorbidity Information' section features a table with two columns: 'Description' and 'Additional Notes'. The first row shows 'Not Applicable' in the Description column and an empty field in the Additional Notes column. A red 'X' icon is visible in the top right corner of the table. Below the table, a text input field is labeled '2000 characters left.' and there are 'Add Comorbidity Factor' and 'Cancel' buttons.

At the bottom of the form, there are three buttons: 'Back', 'Save', and 'Save and Continue'.

You know you are on the “Comorbidity” tab when the tab is highlighted. The information on the screen should be the same as what you see here.

The “Description” element (TR21.21) lists pre-existing co-morbid factors present before the patient arrived at the ED/hospital. Select an option from the drop-down menu. This is a National Data Element. It is defined as “Pre-existing co-morbid factors present before patient arrival at the ED/Hospital”.

Once you have selected a co-morbid factor from the drop-down menu, you can add additional notes (TR21.23) regarding the pre-existing medical condition.

Once you have entered the Comorbidity Factor, you will need to save it by clicking on the “Add Comorbidity Factor” button.

The clipboard and pencil icon allows you to edit Comorbidity factors.

You can delete the Comorbidity Factors by clicking on the red X Icon on the right-hand side of the screen.

Click the "Save and Continue" button to save the information just entered and to continue to the next tab. Clicking the "Save" button will save the information, but you will not progress to the next tab.
